

## **Flexicell to Exhibit at Pack Expo 2008**

Flexicell will be exhibiting at the upcoming Pack Expo 2008 show to be held November 9-13, 2008 at McCormick Place, Chicago, IL. Those interested in researching how robotic case packing, palletizing, and material handling systems can improve their production performance and efficiency should visit Flexicell in the North Hall at Booth #3754.

Flexicell's large booth display will feature several live-action demonstrations to showcase the latest solutions for packing and palletizing, incorporating robots, vision, automatic guided vehicles and video presentations taken at actual installations. They will also have experts and engineers readily available to discuss visitors' current and future manufacturing needs and production challenges.

### **Flexicell, Inc.**

Flexicell, Inc. is a leading robotic systems integrator, providing custom packing, palletizing, and material handling solutions such as case packing, assembly, feeding of product to other machinery, vision guidance, collating, machine load/unload, conveying and palletizing. From its first installation in 1993, Flexicell has created over 300 systems for companies located throughout North America in diverse markets such as food & beverage, pharmaceutical & medical, manufacturing, electronics, automotive, and household. Flexicell is headquartered in Ashland, Virginia. [www.flexicell.com](http://www.flexicell.com).
